Subject index

Acetone
Temperature dependence of the sensitivity of platinized gas-diffusion electrodes towards ethanol and acetone (Huck) 343
Adsorbed monolayers
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 1. Interaction between adsorbed dipoles (Marshall, Conway) 1
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 2. Surface solvation energy of adsorbed charges (Marshall, Conway) 19
Analysis of molecular polarization and interaction in adsorbed monolayers of electrodes. Part 3. Ionic adsorption isotherm with mean field treatment of interactions involving ions and dipoles (Marshall, Conway) 45
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 4. Madelung constants for hexagonal lattices of adsorbed ions and dipoles (Marshall, Conway) 67
Alcohols
Electrochemical preparation and behaviour of poly{pyrrole-[Ru(trpy)(bpy)(OH_2)]$^{2+}$} (trpy = 2,2′ : 6′,2″-terpyridine) (bpy = 2,2′-bipyridine) films. Application to the electrocatalytic oxidation of alcohols (De Giovani, Deronzier) 285
Ammonia
Investigation of *o*-nitrophenol reduction at DME in the presence of ammonia (Przegalinski et al.) 337
Anionic species
Incorporation of anionic species in organoclay-modified electrodes (Falaras, Petridis) 229
Aspergillus niger
Towards mediator design: characterization of tris-(4,4′-substituted-2,2′-bipyridine) complexes of iron(II), ruthenium(II) and osmium(II) as mediators for glucose oxidase of *Aspergillus niger* and other redox proteins (Zakeeruddin et al.) 253
Auger electron spectroscopy
Study of the electrochemical behaviour of gold (111) vicinal faces situated on the [01$\bar{1}$]-zone in aqueous solutions (Lecoeur et al.) 197

Charges
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 2. Surface solvation energy of adsorbed charges (Marshall, Conway) 19
Chromium chlorides
Electrochemical properties of solutions of $CrCl_2$ and $CrCl_3$ in molten alkali chlorides (Lantelme et al.) 325
Conducting Polymer Electrodes
An electrical model circuit that reproduces the behaviour of conducting polymer electrodes in electrolyte solutions (Fletcher) 127
Cytarabine
Some aspects of the mechanism of the reduction of the antineoplastic agent cytarabine on a mercury electrode (Teijeiro, Marin) 175

Deuterium
Charging of the Pd/^{n}H system: role of the interphase (Szpak et al.) 147
Dipoles
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 1. Interaction between adsorbed dipoles (Marshall, Conway) 1
Analysis of molecular polarization and interaction in adsorbed monolayers of electrodes. Part 3. Ionic adsorption isotherm with mean field treatment of interactions involving ions

and dipoles (Marshall, Conway) 45
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 4. Madelung constants for hexagonal lattices of adsorbed ions and dipoles (Marshall, Conway) 67

DME
Investigation of *o*-nitrophenol reduction at DME in the presence of ammonia (Przegalinski et al.) 337

Equivalent Circuit
An electrical model circuit that reproduces the behaviour of conducting polymer electrodes in electrolyte solutions (Fletcher) 127

Ethanol
Temperature dependence of the sensitivity of platinized gas-diffusion electrodes towards ethanol and acetone (Huck) 343

Gas-diffusion electrodes
Temperature dependence of the sensitivity of platinized gas-diffusion electrodes towards ethanol and acetone (Huck) 343

Glucose oxidase
Towards mediator design: characterization of tris-(4,4′-substituted-2,2′-bipyridine) complexes of iron(II), ruthenium(II) and osmium(II) as mediators for glucose oxidase of *Aspergillus niger* and other redox proteins (Zakeeruddin et al.) 253

Gold
Study of the electrochemical behaviour of gold (111) vicinal faces situated on the [01$\bar{1}$] zone in aqueous solutions (Lecoeur et al.) 197

Hemispherical microelectrode
Theory of steady-state voltammetry without supporting electrolyte (Oldham) 91

Hexagonal lattices
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 4. Madelung constants for hexagonal lattices of adsorbed ions and dipoles (Marshall, Conway) 67

Impedance Measurements
An electrical model circuit that reproduces the behaviour of conducting polymer electrodes in electrolyte solutions (Fletcher) 127

Interaction
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 1. Interaction between adsorbed dipoles (Marshall, Conway) 1
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 2. Surface solvation energy of adsorbed charges (Marshall, Conway) 19
Analysis of molecular polarization and interaction in adsorbed monolayers of electrodes. Part 3. Ionic adsorption isotherm with mean field treatment of interactions involving ions and dipoles (Marshall, Conway) 45
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 4. Madelung constants for hexagonal lattices of adsorbed ions and dipoles (Marshall, Conway) 67

Ionic adsorption
Analysis of molecular polarization and interaction in adsorbed monolayers of electrodes. Part 3. Ionic adsorption isotherm with mean field treatment of interactions involving ions and dipoles (Marshall, Conway) 45

Iridium electrodes
Methanol oxidation on modified iridium electrodes (Ureta-Zañartu et al.) 241

Ladder Networks
An electrical model circuit that reproduces the behaviour of conducting polymer electrodes in electrolyte solutions (Fletcher) 127

Langmuir–Blodgett film
Laser Raman spectroscopy of a Langmuir–Blodgett film of 10,12-tricosadiynoic acid (Azumi et al.) 351

Laser Raman spectroscopy
Laser Raman spectroscopy of a Langmuir–Blodgett film of 10,12-tricosadiynoic acid (Azumi et al.) 351

LEED
Study of the electrochemical behaviour of gold (111) vicinal faces situated on the [01$\bar{1}$] zone in aqueous solutions (Lecoeur et al.) 197

Mercury electrode
Some aspects of the mechanism of the reduction of the antineoplastic agent cytarabine on a mercury electrode (Teijeiro, Marin) 175

Methanol oxidation
Methanol oxidation on modified iridium electrodes (Ureta-Zañartu et al.) 241
Molecular polarization
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 1. Interaction between adsorbed dipoles (Marshall, Conway) 1
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 2. Surface solvation energy of adsorbed charges (Marshall, Conway) 19
Analysis of molecular polarization and interaction in adsorbed monolayers of electrodes. Part 3. Ionic adsorption isotherm with mean field treatment of interactions involving ions and dipoles (Marshall, Conway) 45
Analysis of molecular polarization and interaction in adsorbed monolayers at electrodes. Part 4. Madelung constants for hexagonal lattices of adsorbed ions and dipoles (Marshall, Conway) 67
Molten alkali chlorides
Electrochemical properties of solutions of $CrCl_2$ and $CrCl_3$ in molten alkali chlorides (Lantelme et al.) 325

Nickel hexacyanoferrate
Tin(IV) oxide grafted on a silica gel surface as a conducting substrate base for nickel hexacyanoferrate (Zaldivar, Gushikem) 165
o-Nitrophenol reduction
Investigation of *o*-nitrophenol reduction at DME in the presence of ammonia (Przegalinski et al.) 337

Organoclay-modified electrodes
Incorporation of anionic species in organoclay-modified electrodes (Falaras, Petridis) 229
Oxidation
Electrochemical preparation and behaviour of poly{pyrrole-[Ru(trpy)(bpy)$(OH_2)]^{2+}$} (trpy = 2,2′ : 6′,2″-terpyridine) (bpy = 2,2′-bipyridine) films. Application to the electrocatalytic oxidation of alcohols (De Giovani, Deronzier) 285

Palladium
Charging of the Pd/^{n}H system: role of the interphase (Szpak et al.) 147
Photoelectrochemical processes
Photoelectrochemical processes at an n-type CdS:I single-crystal electrode as studied by photothermal laser beam deflection: energy conversion efficiencies and Peltier heats (Grunow et al.) 181
Photothermal laser beam deflection
Photoelectrochemical processes at an n-type CdS:I single-crystal electrode as studied by photothermal laser beam deflection: energy conversion efficiencies and Peltier heats (Grunow et al.) 181
Polypyrrole
Electrochemical preparation and behaviour of poly{pyrrole-[Ru(trpy)(bpy)$(OH_2)]^{2+}$} (trpy = 2,2′ : 6′,2″-terpyridine) (bpy = 2,2′-bipyridine) films. Application to the electrocatalytic oxidation of alcohols (De Giovani, Deronzier) 285

Redox polymer electrodes
Simulation of time-dependent processes at redox polymer electrodes (Deiss et al.) 299
Redox proteins
Towards mediator design: characterization of tris-(4,4′-substituted-2,2′-bipyridine) complexes of iron(II), ruthenium(II) and osmium(II) as mediators for glucose oxidase of *Aspergillus niger* and other redox proteins (Zakeeruddin et al.) 253

Scanning tunneling microscopy
Real time scanning tunneling microscopy imaging of Sn electrodeposition on n-GaAs (Eriksson et al.) 217
Silica gel
Tin(IV) oxide grafted on a silica gel surface as a conducting substrate base for nickel hexacyanoferrate (Zaldivar, Gushikem) 165
Single-crystal electrode
Photoelectrochemical processes at an n-type CdS:I single-crystal electrode as studied by photothermal laser beam deflection: energy conversion efficiencies and Peltier heats (Grunow et al.) 181
Steady-state voltammetry
Theory of steady-state voltammetry without supporting electrolyte (Oldham) 91
Substrate base
Tin(IV) oxide grafted on a silica gel surface as a conducting substrate base for nickel hexacyanoferrate (Zaldivar, Gushikem) 165

Time-dependent processes
Simulation of time-dependent processes at redox polymer electrodes (Deiss et al.) 299
Tin electrodeposition
Real time scanning tunneling microscopy imaging of Sn electrodeposition on n-GaAs (Eriksson et al.) 217
Tin(IV) oxide
Tin(IV) oxide grafted on a silica gel surface as a conducting substrate base for nickel hexacyanoferrate (Zaldivar, Gushikem) 165
10,12-Tricosadiynoic acid
Laser Raman spectroscopy of a Langmuir–Blodgett film of 10,12-tricosadiynoic acid (Azumi et al.) 351
Tris-(4,4′-substituted-2,2′-bipyridine) complexes
Towards mediator design: characterization of tris-(4,4′-substituted-2,2′-bipyridine) complexes of iron(II), ruthenium(II) and osmium(II) as mediators for glucose oxidase of *Aspergillus niger* and other redox proteins (Zakeeruddin et al.) 253
